

I am extremely pleased with the purchase of our Marq random tape machine. Prior to purchasing the Marq a lot of effort went into researching tape machines trying to find the best machine on the market for our new operation.

Marq was the obvious choice for several reasons. Its design is well thought out and it is a very rugged machine. It is designed to last, it is designed for low maintenance and it is designed for easy operation.

It is very accurate and does a nice job taping all sizes of boxes.

When the tape machine arrived it was on a pallet wrapped in heavy plastic. The plastic was signed by all the builders and quality control. This was a sign that these people take great pride in their work and have the confidence in their product to put their individual signature on the product they are shipping.

My experience with Marq on a scale of 1 to 10 from the point of sale and delivery based on a short lead time, to the installation based on our schedule , training on the machine and the performance of the taper has to be rated a 10.

Marq has been a GREAT Company to work with and we are pleased with our purchase..
