

September 26th, 2008

MARQ Packaging has a reputation for building rugged ready to run equipment that meets all the day-to-day activity required in our facility. The setup and service of the equipment is excellent and the availability to meet our time lines was unprecedented. I would recommend a MARQ machine to anyone.

The equipment that we purchased was part of a new line to increase our productivity and efficiencies. The machine eliminates any handwork. Cartons are now made automatically and on call. This mean less clutter in our plant and it enables us to pack out nice clean cartons with the vibrator top sealer unit. This machine increased our output by 25%.

The sales and service team at MARQ Packaging has earn my trust and respect. They took pride in providing us with equipment that solves our production issues. They were very knowledgeable and helpful through the entire buying process. When it comes time to purchase another machine I will work with MARQ Packaging without question.

Great Job Guys,
