MARQ Packaging Company
P O Box 9063
Yakima, WA 98909

To MARQ Packaging Equipment:

This testimonial letter was written on behalf of Oil-Dri Corp. of Georgia, to express our satisfaction with the MARQ HPE-NS Case Erector Bottom Sealer we've recently implemented in our facility.

Prior to purchasing the MARQ Case Erector we were paying to have our cases erected and packed with empty jugs outside of our facility. When we received them in large quantities, we would then unpack the cases, fill the containers, and then repack them for distribution.

Since installing and setting up the machine and after some training and initial setup issues, we have started saving on labor charges both inside and outside the facility as well as saving on transportation cost as we are able to receive more jugs on each truck load.

Our first experience with MARQ solutions was with a HPA(RH)C Case Sealer we purchased in 1999. We have had such excellent service from this machine that our Mississippi plant purchased another one for their plant. They had also already purchased a HPE-NS Case Erector Bottom Sealer and had also had excellent service from it. Our decision to purchase the Case Erector was based upon the reliability of the MARQ equipment that we had already purchased and their ability to perform in a very hostile packaging environment such as ours and also to standardize our equipment.

MARQ Packaging was able to build a machine to meet our requirements, and it was done in a timely manner, as was quoted. What service has been needed (although it has been minor) was handled both timely and professionally. Their field service partners (Unisource) have been exceptional in both initial repairs and training to our line operators. I look forward to working with the MARQ team for any of our future automation projects.

Thank You,

Edwin A. Ruff
Scoopable Production Supervisor
