MARQ's High Performance Adjustable Gap Flap Case Sealer provides automatic top and bottom flap folding and glue sealing for RSC & RSC Gap Flap cases. Gap flap cases save on corrugated costs because it takes less materials to make each case. This machine features a product support plate, 6" side belts to maintain stability and case integrity, and an indexing gate standard to prevent double feeding of cases.

This case sealing equipment promotes simplified flap folding and easy adjustability for quick case changeovers. With its heavy duty powder coated 3/16 inch steel frame, this machine is built to withstand the daily rigors of 24/7/365 applications. Stainless steel construction is also available upon request.

Talk to a MARQ representative to see why this machine could work best for your application.

Standard Features

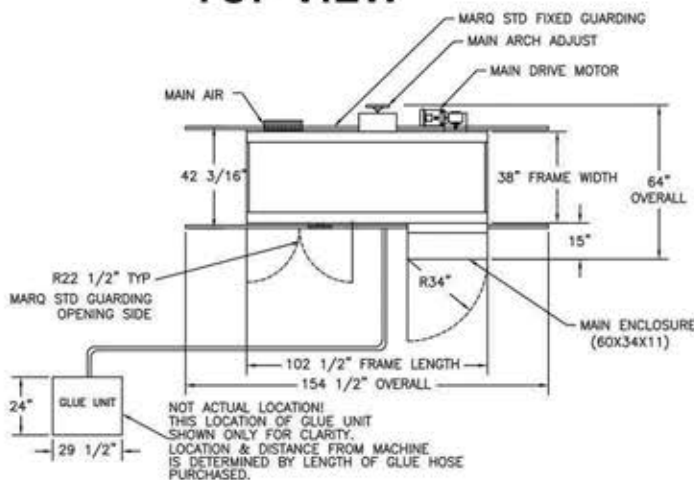

- Wiring practices conform to NFPA standards
- Operator friendly design
- Quick changeover
- Fully guarded
- Continuous feed hopper
- UL508A listed electrical panels
